

Services Overview

Owned and operated by radiologists for radiologists, NightShift has provided on-call teleradiology solutions nationwide since 2001. More than 2 million cases have been read in the company's decade long history. Our comprehensive services and commitment to client satisfaction is reinforced by our stringent quality assurance and monitoring processes. By partnering with NightShift, you can expand the level of care you provide at the time you need it most, through unparalleled service.

- NightShift is focused on helping your business thrive by offering reliable preliminary and final interpretations. Upon receipt of images by our radiologists, we provide preliminary interpretations in an average of 20 minutes or less. For facilities seeking to expand their practice and increase workplace efficiency, NightShift is skilled at delivering attentive, personal service in time-sensitive situations. Our advanced network enables rapid image transfer, ensuring a smooth workflow between your facility and our radiologists.
- NightShift is a fully accredited JCAHO organization. We earned the Joint Commission Gold Seal of Approval after a thorough review of our operating policies and procedures, radiologist credentials and our Quality Assurance/Quality Improvements program.
- All NightShift radiologists are U.S.-based and 100 percent board-certified. Each works full time with our group — we never hire contractors or locums. Plus, the majority of our radiologists have completed fellowship or advanced training for body or neurological interpretations.
- Each NightShift client hospital receives a dedicated, direct toll-free phone and fax number to reach their assigned radiologist. With a single call, ordering physicians or a radiology department can consult with the NightShift radiologist to discuss case details without the hassle of navigating a switchboard or intermediary.
- NightShift constantly monitors performance through a comprehensive Quality Assurance/Quality Improvement program. Clients receive quarterly QA/QI reports on each of our radiologists, as well as for our practice. With more than two million cases read, we offer superior quality with a discrepancy rate of a fraction of one percent for all discrepancy categories.

Contact NightShift to discover how teleradiology can benefit your facility. To schedule your free price consultation with no contractual obligations, please call (888) 318-8900.
